Indiana, PA • (724) 464-9518 • prestonefox4444@gmail.com • [Portfolio](#) • [LinkedIn](#) • [GitHub](#)

Full Stack Software Engineer

Full Stack Software Engineer student building real-time web apps, secure backends, and scalable APIs with JavaScript, Python, and Rust. Experienced in databases, third-party integrations, and delivering production-ready solutions.

Skills

Languages: JavaScript, TypeScript, Python, Rust, Java, HTML, CSS, SASS, SQL

Frameworks/Technologies: React, React Native, Vue, NodeJS, Flask, Django, Tailwind CSS

Databases & Tools: Supabase, MySQL, PostgreSQL, MongoDB, Docker, Git, GitHub

Other Skills: Agile Development, Problem Solving, Team Collaboration, Adaptability

Experience

Inventory Associate & Independent Software Developer

June 2022 - Present

Retail Services WIS Corporation

Elmira, New York

[GitHub Repo](#)

- Conducted inventory audits at **250+ Walmart and Sam's Club locations**, maintaining 99% accuracy under tight deadlines.
 - **Developed a Windows desktop app** to automate reporting and monitor individual/team performance and miscounts.
 - **Engineered multi-table SQL queries** and PDF reports used daily by management, improving operational efficiency.
 - Created **67+ test cases** to ensure reliability in a fast-paced production environment.
 - **Contributed to team performance ranked #1 company-wide for two consecutive years.**
-

Projects

Knowledge Hub

Full Stack Developer | React, TypeScript, Supabase, PostgreSQL, Tailwind CSS

[GitHub Repo](#) | [Live Demo](#)

- Built a collaborative knowledge platform with React and Supabase, supporting **100+ concurrent tasks**.
- Implemented resources, bookmarking, real-time collaboration, and smart search functionality.
- Implemented Supabase Auth with protected routes and row-level security for secure, user-isolated data.
- Developed a responsive, mobile-first interface optimized for WCAG and **10+ browsers**.

Auction House & E-commerce System

Full Stack Developer | React, Flask, MySQL, Stripe, PostHog, MailerSend, Socket.IO

[GitHub Repo](#)

- Developed a real-time bidding and purchasing system for **50+ concurrent users** using React, Flask, and MySQL.
 - Developed admin and user dashboards for managing listings, bids, purchases, and support tickets.
 - Implemented real-time chat and bidding with Web Sockets via Socket.IO.
 - Integrated Stripe, PostHog, and MailerSend, reliably sending **500+ notifications**.
 - Added role-based access and admin tools for listing approvals and ticket management.
-

Education

Bachelor of Software Engineering, Computer Science

August 2021 - December 2025

Indiana University of Pennsylvania (IUP)

GPA: 3.3

Relevant Coursework: Data Structures & Algorithms, Software Engineering Practice, Web Architecture & Application Development, Artificial Intelligence, Unix Systems
